American Fantasy Television Series (stylized as "arc: out in first word") is a television series about a fictional world. The series revolves around a character named Atticus, who is a human living in a fantasy world. The series is produced by HBO and is based on the novel of the same name by Philip Pullman. The show features a time-traveling protagonist who is able to bring fantastical creatures and elements into the real world. The show was cancelled after its second season due to low ratings. 

The show is set in a world where magic is real and fantastical creatures exist. The main character, Atticus, is a young man who is able to access these fantastical elements and bring them into the real world. The show explores themes of identity, fantasy, and the power of imagination. The show's visual effects are highly praised, and the series is known for its unique blend of fantasy and sci-fi elements. Despite its cancellation, the show has gained a strong following among fantasy and sci-fi fans.

In terms of production, the show is shot in multiple locations around the world, including a mix of real locations and specially constructed sets. The show's budget is reportedly in the hundreds of millions, with each episode costing around $3.5 million. The show's writer and creator, Philip Pullman, is known for his previous work on the novel "His Dark Materials," which was adapted into a popular series in 2019. The show's creator, Philip Pullman, is also known for his previous work on "The Golden Compass," which was adapted into a successful film franchise in 2007. The show's writer and creator, Philip Pullman, is also known for his previous work on the novel "The Subtle Knife," which was adapted into a popular series in 2012.
